Application/Control Number: 09/529680 Page 2

Art Unit: 1755

1. Applicants are requested to correct the subscripting of line 4 of claims 4 and 14.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 has been amended to include Al<sub>2</sub>O<sub>3</sub> however claim 14 already includes Al<sub>2</sub>O<sub>3</sub>.

- 4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 5. Claims 4-23 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hintermayer (US 5,998,319 or WO 97/21644), for reasons of record.

The examiner agrees that Hintermayer does not disclose oxide nitride phase therefor the oxide nitride phase must not be present in the sintered body of Hintermayer and must meet the limitations of the instant claims which set forth less than 1% which may be zero.

Also applicants argue that Hintermayer do not provide ceramic materials which have high corrosion resistance. This is not persuasive because the materials in Hintermayer may be used in wear components or bearings (see column 3, line 1-3). Furthermore applicants claims do not exclude glass or glass components or set forth ranges of components which exclude the glass of Hintermayer.

 $\mathcal{O}$ 

Application/Control Number: 09/529680 Page 3

Art Unit: 1755

6. Claims 4-23 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sato et al for reasons of record.

It is agreed that only one example of Sato et al exemplify a ratio of greater than 60% however it is immaterial whether the example is comparative example or not as long as it meets the composition of the claims. Sato et al clearly teach the sintering aids of SiO<sub>2</sub> and Al<sub>2</sub>O<sub>3</sub> (Table 1) which are reacted to form the grain boundary phase. Furthermore the ranges taught in Sato et al overlap the ranges in the instant claims.

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl Group whose telephone number is (703)308-3821. The examiner can normally be reached on Monday-Thursday from 6:30 AM to 4:00 PM.

Application/Control Number: 09/529680 Page 4

Art Unit: 1755

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell, can be reached on (703)308-3823. The fax phone number for this Group is (703)872-9310, for any non-final amendment or communication, and (703)872-9311 for any after-final amendment or communication.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703)308-0661.
